MRB have been assured that the sewer line show on the map as coming in from the eastern boundary of the business park is publicly owned and maintained.</p> <p>Existing Structures: Elan's response on this is, "Perhaps the standing chimney could be left as an iconic feature but most likely would be removed to accommodate new facility foot-prints. MRB would apply a concept level budgeting cost for hazardous material testing and demolition at \$40,000. MRB suggests next step would be hazardous materials testing, demolition permit, and demolition documents for bidding the removal work."</p>
8/20/20	<p>Response to our Questions:</p> <ul style="list-style-type: none"> • Water and Sewer Lines – see the attached draft layout plan that shows the locations of the water and sewer lines. <ul style="list-style-type: none"> o As a follow up, you asked us to verify whether the sewer lines shown on the map coming from the eastern edge are private or public lines. I am asking Elan to verify this information for you. • Subdivision layout – as we discussed, the subdivision layout lines are simply to show where the lots could logically be subdivided. We would not suggest moving forward with the subdivision until an end user is identified, because the ultimate location and size of the buildings will drive the subdivision. (No sense moving forward now to only have to redo it potentially in the future.) • You asked me about the existing, obsolete structures on the site and whether the demolition and removal of those structures was contemplated in this master plan. Specifically, you mentioned that there was a 200ft smokestack, a few dilapidated buildings and concrete debris, and that the presence of these materials inhibits the upkeep of the site (can't get someone to brush hog the site with debris that could destroy the machines). <ul style="list-style-type: none"> o Asking Elan to weigh in here as well – what are your thoughts on this aspect of the master plan? If Jody wanted to phase this and just deal with demolition/removal, what do you think that would cost? Any other steps to move this forward?
8/17/20	Sent comments and questions back to the MRB Group regarding water and sewer line locations.
